

## Palfrey Street ReportPlus 1.1 For Open Text Content Server 10

June 2011

### Overview

ReportPlus 1.1 provides a one-click method for users save the results of a LiveReport to a comma separated (CSV) or tab delimited (TXT) file. The data from an exported report can now be easily opened and formatted in a spreadsheet application, such as Microsoft Excel, or imported into another application for analysis.

### Easy To Use

ReportPlus 1.1 adds an “Export” button at the end of every LiveReport. Just select the format, click and specify where to save the file.

221	23	Login	05/17/2011 08:36 AM	?	?	3565	3565	?
222	10	AttrChange	05/17/2011 08:36 AM	12341	299	?	3565	?
225	11	AddVersion	05/17/2011 08:40 AM	14321	144	?	3565	ReportPlusProduct.docx
226	1	Create	05/17/2011 08:40 AM	14321	144	?	3565	?
229	14	Fetch	05/17/2011 08:41 AM	14542	144	?	3565	?
230	14	Fetch	05/17/2011 08:41 AM	14543	144	?	3565	?
232	10	AttrChange	05/17/2011 08:42 AM	12341	299	?	3565	?

ReportPlus creates the output file from the displayed contents of the LiveReport in the browser. It does not re-run the report to fetch the data a second time, so there is no waiting for the report to run again.

### Compatibility

ReportPlus 1.1 can be installed in Content Server (Enterprise Server) 10. Version 1.0.1 is also available for Livelink 9.6.0, 9.7.0, and 9.7.1. ReportPlus is designed to work with Microsoft Internet Explorer 7 and 8 and Firefox 3.0 and 3.5. ReportPlus extends the functionality of the Report module, which is normally installed as part of the core Content Server or Livelink.

### Licensing

ReportPlus 10.0 can be licensed by individual Livelink instance (server) or as a site license for a single organization.
